

Renewable Energy Research Collaboration

- Organization: Green Power Corp.
- Department: Mechanical Engineering
- Start Date: 2023-02-15
- End Date: 2026-02-14
- Stall Coordinator: Prof. Mark Daniels
- Desired Outcome: Develop solar panel efficiency enhancement techniques.
- Payment: \$150,000 over three years.
- Description:

This collaboration focuses on enhancing solar panel efficiency using innovative materials and coatings to reduce energy loss. The goal is to make solar power more affordable and sustainable.
